TERRACARE ASSOCIATES ANNOUNCES CONTRACT WITH THE CITY OF LIVERMORE, CALIF.

Martinez, Calif.— Terracare Associates, LLC (TCA) is excited to announce its contract with the City of Livermore, Calif., to provide landscaping services for the city's streetscapes and parks. The contract began April 1, 2013.

Although TCA has long worked in the San Francisco Bay Area, this contract establishes the company in the "Tri Valley" area. TCA will operate from a yard within the City of Livermore, creating a new office for our growing company. Working throughout the city offers TCA an excellent way to interact with citizens and promote the brand.

The City of Livermore has an estimated population of over 80,000, and spans approximately 25 square miles. The contract includes streetside maintenance of medians, right-of-ways, walkways and a number of small parks. Branch Manager Kris Dasso and Account Manager Matt Weist will manage the contract. "We do a lot of fast, high-speed zones as far as medians go," said Mr. Weist. "It's a good-sized city, spread out. Making sure we get every single corner and median on the streets will be a priority."

Terracare Associates has earned a reputation through more than 40 years of exceptional service with a strong commitment to client satisfaction. Headquartered in Littleton, Colorado, Terracare Associates provides comprehensive public works maintenance services as well as landscaping and aquatics maintenance throughout the Western United States. Currently Terracare Associates has a number of other roadway and right-of-way maintenance clients, most notably Northwest Parkway and E-470, both of which are roadways located in the Denver metropolitan area.
